## Career Objective

As a frontend developer I'm skilled in HTML, CSS, and JavaScript and excited to create user-friendly websites. Eager to learn and grow, I'm ready to contribute my skills and enthusiasm to create engaging web experiences.

## Projects

- ❖ I crafted a basic Amazon clone website with HTML and CSS, featuring product displays and layout inspired by the original e-commerce platform.
- ❖ I constructed an ENERGYM Gym clone website using HTML and CSS, replicating the gym's layout and aesthetics, complete with responsive design and styling elements.
- ❖ I designed a word-guessing game using HTML, CSS, and JavaScript. It offers 6 or 8 chances for different words. Correct guesses trigger "Congratulations, you for a word," while incorrect attempts lead to "Game over."
